

Revamp of the Underwriting Workflow

Cathay Life Insurance (2024/12 - Present)

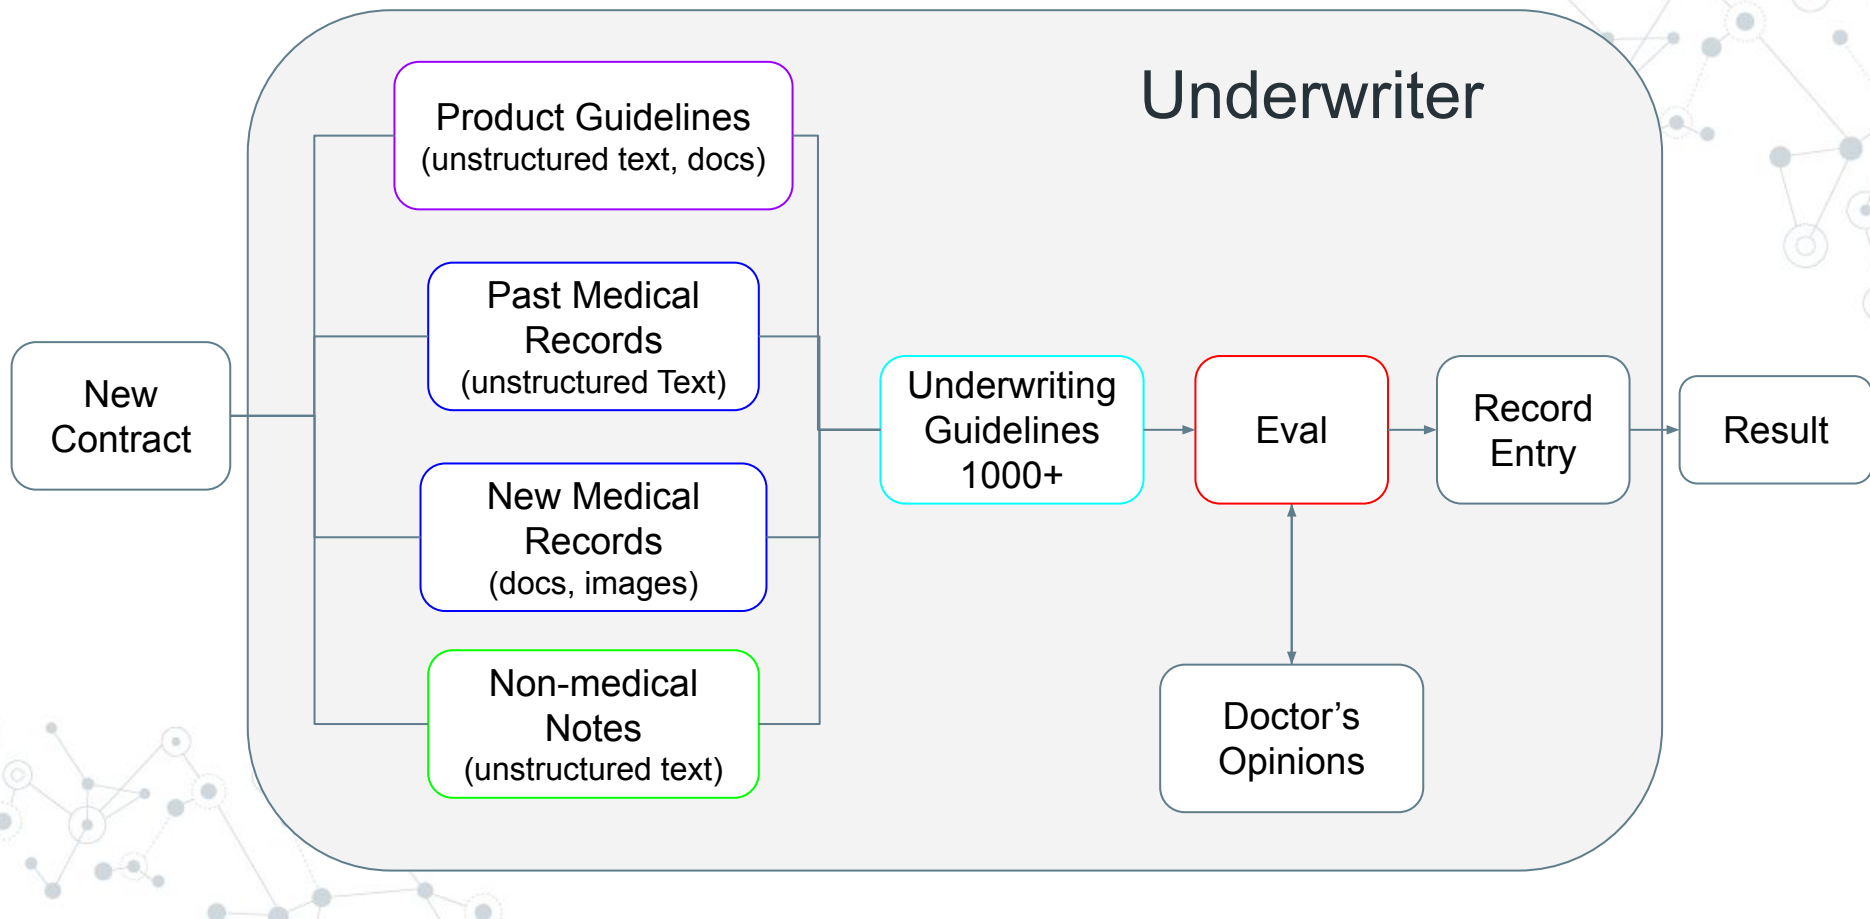

***Due to confidentiality, all confidence information has been modified.**

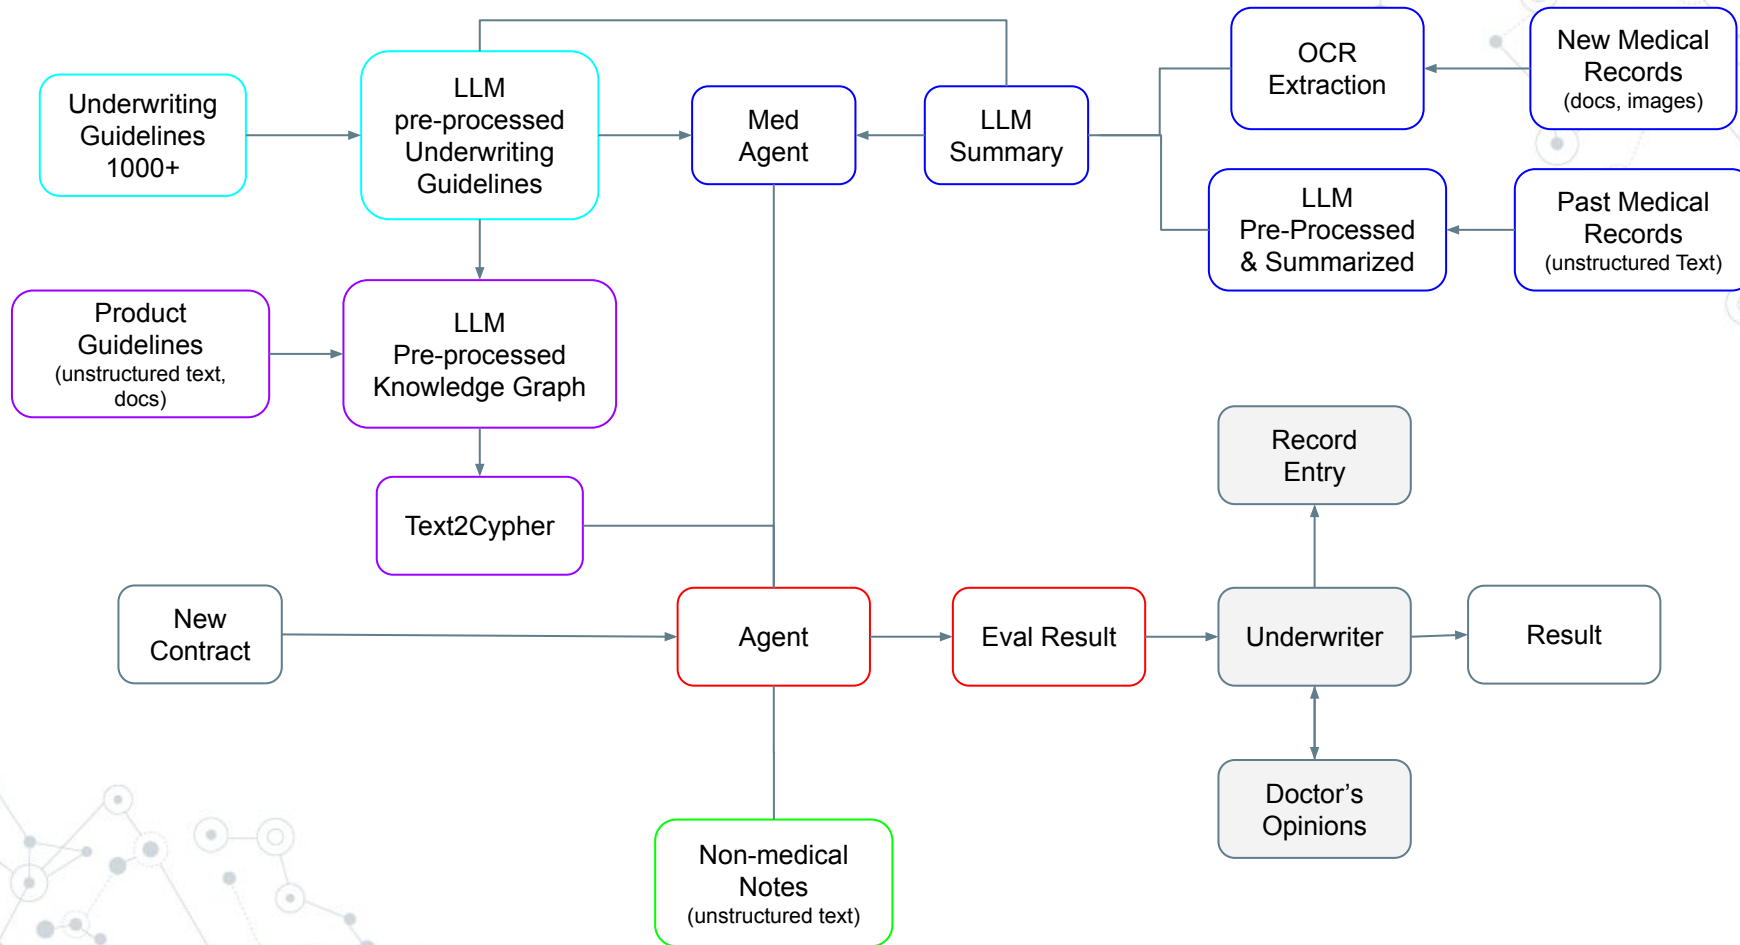

Project Description

- ◎ This project aimed to build an AI-driven underwriting automation platform that ingests unstructured medical documents, product guidelines, and legacy rulebooks, then outputs consistent, auditable risk decisions.
- ◎ Issue: Traditional underwriting is slowed by scattered product and underwriting guidelines and human interpretation of complex medical records. These result in long turnaround times, data entry errors, and decision variability.
- ◎ Target Users: The underwriting department

Past workflow

New Workflow

Digitization of Underwriting Guidelines

壽險核保標準(xxxxxx修訂): 1.無甲狀腺惡性病變: (1)現症: A.伴[REDACTED]狀腺結節{{A101}}評估。 B.無結節, 僅甲狀腺腫大: (a)近期病灶體積[REDACTED]狀腺功能亢進-----依甲狀腺機能亢進{{A10B}}評估。 II.伴有甲狀腺功能減退-----依甲狀腺機能不足{{A1033}}評估。 III.甲狀腺功能正常-----100。 (b)近期病灶體積或疾病症狀有改變-----醫鑑。 (2)既往症: A.目前甲狀腺機能正常-----50。 B.目前甲狀腺機能異常: (a)甲狀腺功能亢進-----依甲狀腺機能亢進{{A10B}}評估。 (b)甲[REDACTED]能不足{{A103}}評估。 2.伴甲狀腺惡性病變-----依甲狀腺癌評估。

腎、尿檢、eGFR狀況
正常

評分結果: [Redacted]

- ◎ Health Risk Calculator
 - Remove unnecessary human variance
 - Speed up evaluation process
 - Usage Rate: 100%
- ◎ Visualization
 - Increase interpretability
 - Enhance maintainability

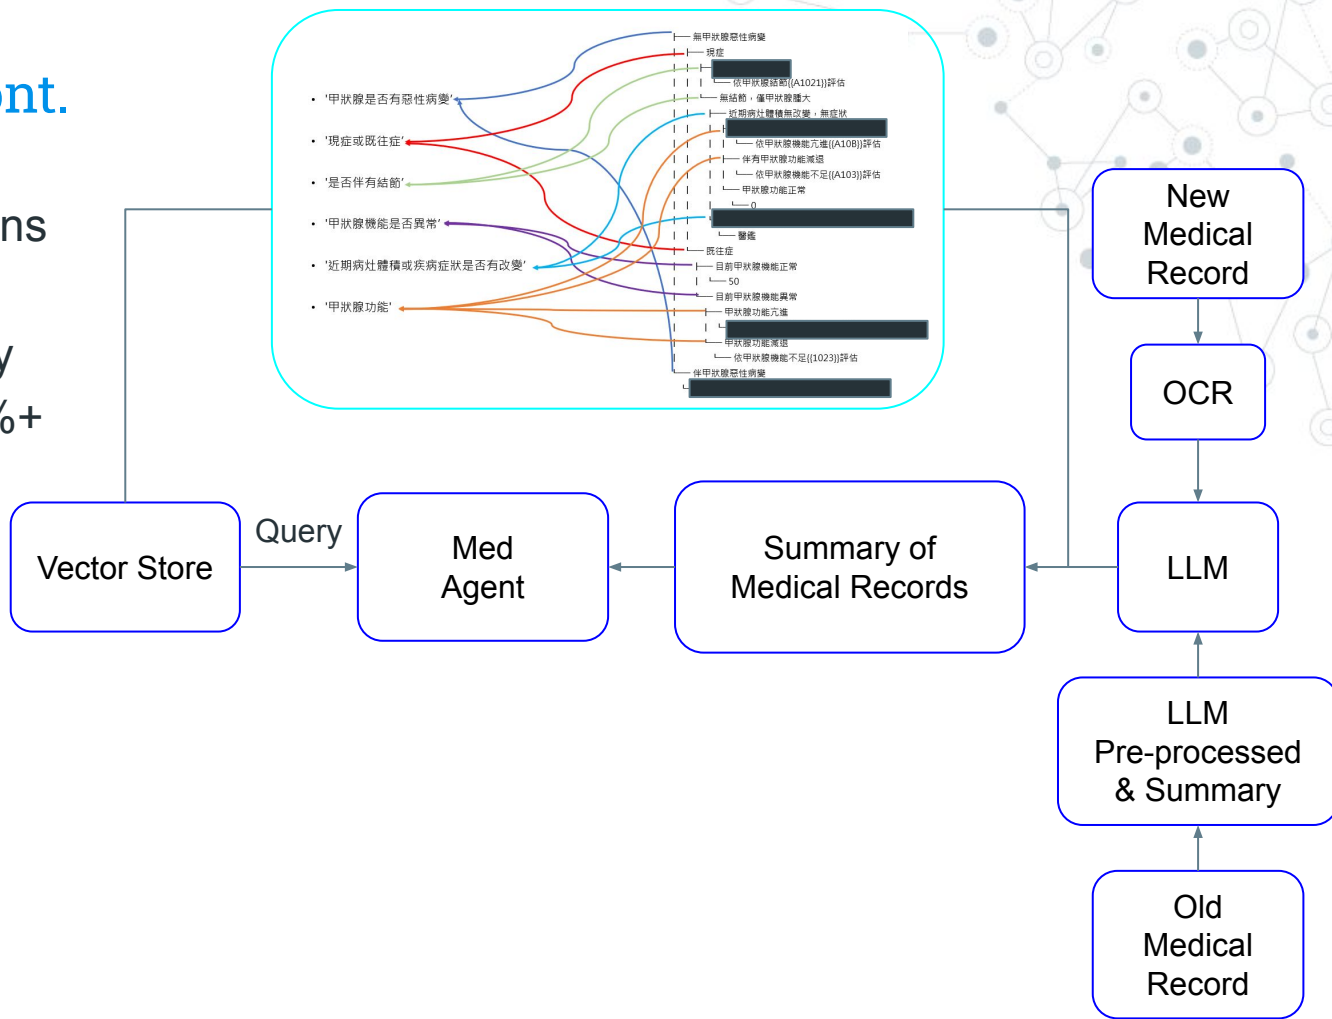

Application 2:

Application 2 Cont.

- Processed 30 millions old medical records
 - 95%+ accuracy
- OCR accuracy: 88%+

Application 3 (WIP):
